Code written

```
class Solution {
public:
bool isPalindrome(int x) {
if (x < 0 || (x % 10 == 0 && x != 0)) {
return false;
}
int reversedHalf = 0;
while (x > reversedHalf) {
reversedHalf = reversedHalf * 10 + x % 10;
x /= 10;
}
return x == reversedHalf || x == reversedHalf / 10;
}
};
```
